**Be Engaged, Educated and Excited. Get Involved at EduTECH Africa 2018.**

EduTECH Africa is the leading marketplace and ideas exchange for African schools and governments hungry for innovative solutions.

It has been the catalyst for technology and learning across Africa and the 2017 edition of the conference was no different.

The conference played a key role as the annual meeting place for educators, principals and government departments from across Africa looking to implement the right tools to create engaging lessons for all learners.

Running for the 3rd year, the conference saw over 300 educators, from 43 countries come together to deliver greater learning outcomes both inside and outside the classrooms.

In 2017, the two day line-up featured incredible speakers from the education sector and government, hosting over 50 conference sessions, a pre-event workshop, an onsite workshop and 15 roundtable discussions.

In 2018, EduTECH Africa will bring together the thought leaders in education from across Africa and the world. Educators will be challenged to think differently.

With 5 streams and over 150 speakers each discussing gripping topics and overflowing ideas, the conference will inspire change in the African EdTech industry.

If you would more information about the 2018 conference, please call Tumisang at 011 516 4051 or email [Tumisang.Thage@terrapinn.com](mailto:Tumisang.Thage@terrapinn.com)
